

THE MATH MASTERY BLUEPRINT

PROGRAM OVERVIEW

FOR PARENTS OF CHILDREN WITH HIDDEN POTENTIAL

AUGUST, 2024

Overview

About the Math Mastery Blueprint

Have you ever had your child experience anxiety about Math? This usually comes in many forms. Some behaviors include:

- Understanding the concepts in class but having a hard time getting high marks on quizzes, tests, or exams
- Developing dread or anxiety about written evaluations
- Your child losing confidence in his/her own Math abilities, which affects his/her self-confidence

The Math Mastery Blueprint (MMB) was designed to help students who may struggle with these experiences. Through setting a solid foundation and building from the ground up, the MMB helps students to:

- a.) Build a strong foundation for their success
- b.) Develop important critical thinking skills in Mathematics
- c.) Develop your child's confidence and self-esteem in the process

About Me

I have been a teacher in Ontario for the past 6 years, with the first four years teaching Grades 6-8, and the last two years teaching Grades 9-11. I've been a Math Tutor since 2015, and during the Pandemic, I was able to help hundreds of students find joy in Mathematics again as it was extremely difficult to learn at the time. I focused on small classes and one-on-one guidance, which is the same formula that is going to be applied for this upcoming online course. I have earned a reputation as a Teacher who will do what it takes to guide your child in the right way.

I believe that all students should feel confident about themselves, and the Math Mastery Blueprint is a way to develop and boost this inner confidence that is waiting to spring up in your child.

The Process

The upcoming Grade 9 Math class, slated to run from September 3, 2024 to November 14, 2024 (12 Weeks), will have the following learning goals:

Goals

1. To adequately prepare each student for success in their school Math class (a mark of 80% or higher)
2. To instill confidence, joy, and a more positive outlook for each student towards Mathematics and life.

Class Size and Meeting Schedules

The maximum class size is 5 students.

- Group classes will run on Tuesdays and Thursdays, from 6 pm to 7 pm (the time can be adjusted to best fit the group’s availability)
- There will be a weekly onboarding call for each student (1-on-1 guidance) and three parent/student conference calls for the 12 weeks (once every 4 weeks).
- Students will have access to online materials, learning videos, and an online support forum for the duration of the period.

Meeting Venues	Online through Zoom
Support Resources	<div>The Math Mastery Blueprint Package Includes:</div> <ul style="list-style-type: none">• Weekly Onboarding Calls (1-on-1 support)• Online Materials and Learning Videos• Support System for Students and Parents to Ask Questions• Personalized Guidance
Homework	Practice Resources Available Through Learning Portal
Habit Practices	Time Management and “Study Skills Development” are Taught as part of the Math Mastery Blueprint
Mental Resilience	Students are Guided Through Working Out Anxiety Issues as They Journey through Turning Math from a Burden into a True Joy

Course Content

Units Covered:

- **Development of Numbers and Number Sets**
- **Exponents (Powers)**
- **Number Sense and Operations**
- **Algebraic Expressions and Equations**
- **Practical Applications of Mathematics (Everyday Applications)**
- **Relations (Applications and Characteristics of Relations)**
- **Data Literacy**
- **Mathematical Modeling**
- **Geometry and Spatial Reasoning**
- **The Cartesian Coordinate System**
- **Financial Literacy in Mathematics (Interest Rates, Time Value of Money, etc.)**

Program Benefits

The Math Mastery Blueprint Helps Students:

- Master the basics and build solid foundations for understanding
- Practice consistently by developing organized and habitual study patterns
- Relate Mathematics to real-world applications (making wise decisions using data and numbers)

Your Child Deserves to Be Set Up For Success!

- The Math Mastery Blueprint is a springboard for future joy and success for your child
- When Math becomes enjoyable for your child, the world opens up to him/her
- Your child is now free to choose any career he/she wants as Math will no longer be a hindrance towards pursuing their true passion!
